Job ID: LSTC-EM-0316

Date posted: 03/04/2016

Location: Livermore, California

Position: Full-Time software developer.

Job description:

Livermore Software Technology Corporation seeks a software developer with exceptional programming skills combined with expertise in electromagnetism. LSTC develops the multi-physics software program, LS-DYNA, which performs strongly coupled mechanical/thermal/fluid/electromagnetic simulations. Qualifications require a PhD in physics, mathematics, electrical, or mechanical engineering and a proven background in electromagnetism.

About LSTC:

Livermore Software Technology Corporation LSTC develops the multi-physics software program, LS-DYNA.
